

Landing page — three directions

POS + inventory + accounting, Pakistan market. Restaurants & cafés, multi-outlet chains, salons & clinics. Industry tabs are interactive in the live file; all three panels are printed here. Striped blocks mark where product screenshots go.

Direction A — Structured enterprise

FBR POS INTEGRATED

Billing, inventory and books. One system.

Pointly runs the counter, the kitchen, the stockroom and the ledger — so your month-end closes itself. Built for multi-outlet operators across Pakistan.

Restaurants & cafés

Multi-outlet chains

Salons & clinics

KOT to closing entry, untouched by hand

Table maps, split bills, kitchen display and recipe-level stock deduction. Every settled bill posts straight into the ledger with the right tax head.

- Recipe costing and wastage per outlet
- Aggregator orders on the same ticket queue
- Shift-wise cash reconciliation

screenshot – table map + KOT queue

Chains panel — twelve outlets, one closing balance: central catalogue with local overrides, transfers with in-transit tracking, consolidated P&L and franchise royalty runs.

Salons & clinics panel — appointments that bill themselves: memberships and prepaid packages, per-staff commissions, client history on the billing screen.

Counter billing

Barcode, scale, cards and wallets — and it keeps selling offline.

Live inventory

Batch, expiry and reorder points that raise the PO for you.

Books that close

Ledgers, sales tax returns and WHT posted from source documents.

Purchase & vendors

Three-way match from PO to GRN to bill, with vendor ageing.

Staff & access

Shift logins, discount limits, audit trail on every void.

Reports on tap

Item movement, hourly footfall, outlet margin — scheduled.

Pricing per outlet, per month

Counter

Rs 3,999

Offline billing, cards, wallets
Day-close and basic stock
FBR-compliant invoices

Operate • most chosen

Rs 9,999

Everything in Counter
Purchase, vendors, ageing
Ledgers and FBR returns

Chain

Rs 19,999

Everything in Operate
Central catalogue & transfers
Consolidated P&L, royalty runs

Monthly / annual toggle in the live design — annual saves 20%.

Questions we get before the demo

Does billing keep working without internet?

The till holds a local catalogue, keeps issuing bills offline and syncs the queue when the line returns.

Which hardware does it run on?

Android tablets, Windows tills or the Pointly terminal; printers, scanners, scales and drawers auto-detect.

Can we migrate from our current POS?

Items, vendors, opening stock and balances import from CSV or a database dump — one evening, typically.

Do auditors get their own access?

Free read-only logins on every plan, plus QuickBooks and Xero exports.

See it run on your own menu.

45-minute walkthrough with your catalogue loaded. No slides.

POS · INVENTORY · ACCOUNTING

Your counter already knows what your books need to say.

One ledger from the first bill of the day to the filed return — for restaurant groups, salon chains and clinics across Pakistan.

hero product shot — dashboard, dark UI

01 / THE PROBLEM

Three systems, one truth — and none agree

The till says one number, the stock register another, the auditor a third.

02 / THE SHIFT

Every bill writes to stock and the ledger at once

One document, three consequences, no re-entry.

03 / THE RESULT

Month-end goes from four days to one afternoon

Returns file from source documents; your auditor logs in.

Restaurants & cafés

Multi-outlet chains

Salons & clinics

screenshot — kitchen display + table map

The kitchen never waits for the counter

Orders route to the right station the second they're punched, and every plate deducts its recipe from stock.

Split bills, part payments, table merges

Wastage and yield per outlet

Shift cash reconciliation at day-close

Offline-first till

Bills keep printing through outages; the queue syncs itself.

Batch & expiry

FIFO picking and expiry alerts before stock turns dead.

FBR integration

Live invoice numbers pushed to FBR, returns from posted documents.

Vendor ledger

PO to GRN to bill, matched — with ageing you can act on.

Audit trail

Every void, discount and price edit signed by a staff login.

Open API

Webhooks and REST for aggregators, loyalty and payroll.

POS · INVENTORY · ACCOUNTING — ONE LEDGER

One bill.
Three books.
Zero re-entry.

Pointly posts every sale to stock and to the ledger the moment it's rung up. Restaurants, salons and multi-outlet groups across Pakistan run their whole back office on it.
